Benefits

Agile Project Management provides a flexible yet controlled process to deliver solutions. It enables organisations to gain the benefits of an agile approach without introducing unnecessary risks. This enables a measured and balanced change, keeping what is good in the current organisation and retaining existing good practices around project management and delivery whilst gaining the benefits of a more agile way of working. AgilePM® combines effective use of a team's knowledge together with techniques such as iterative development and modelling to achieve tight project delivery timescales. It offers flexibility while still recognising the processes and controls that give you, as a project manager, confidence to run your projects effectively.
