

Digital Skills

Certified ISO 27018 CIS CPS Training (Online)

Course Details

Price

£1,295.00

Length

2 Full days (09:30 -17:00)

Course Overview

Learn about implementing the data privacy security controls in public Clouds as per the ISO 27018:2019 standard, which concerns the protection of PII (personally identifiable information) in public Clouds for those acting as PII processors. This online course looks in-depth at how data protection and data privacy are secured in Cloud environments.

This course is delivered virtually through the GTA, tutor led in real time.

Course Content

ISO 27018 narrows its focus to the protection of personally identifiable information (PII) in public cloud environments. It provides a code of practice for cloud service providers processing PII.

This online training will cover the following topics:

Flexible learning that works for you

E:admin@gta.gg | T:224570 | W:gta.gg

Proudly part of
 THE GUERNSEY INSTITUTE

- Key EU, UK and other privacy regulations and laws
- The roles and responsibilities of data processors and controllers
- Key terminology and concepts as used in different standards and regulations
- Risk scenarios and the limits of mitigating controls
- How ISO 27002 applies to cover PII in the public Cloud
- The detailed obligations of a public Cloud PII processor
- Relevant access control, access management and cryptography operations
- Protection of data at rest including backup and restoration
- Incident management for PII in the Cloud
- Performing information security reviews via audit services and other means

Benefits

By attending this online course, delegates will deepen their understanding in using the terminology of data privacy and data protection confidently, analysing environments, contracts and processes with confidence.

Next Steps

If you are interested in taking the course online, please register your interest through the 'Register Interest' button on the right hand side of this page, and we will contact you with the information you need to start your on-line training journey.

Course Tutor

IT Governance - A GRC Solutions Company

IT Governance - A GRC Solutions Company is a professional services company, founded in 2002, with a wealth of consultancy skills that originally focused on information security/cybersecurity standards, notably ISO27001. Their consultants have extensive practical experience of designing and implementing management systems and help to develop the skills needed to deliver best practice and

compliance in an organisation. The company has an impressive track record having helped well over 130 clients over the years to successfully gain the coveted ISO27001 certificate, proving their compliance with one of the most demanding management system standards. They have since developed their offerings into various other management disciplines and now provide a comprehensive single source of information, advice, books, tools, consultancy and training for IT governance, risk management, compliance and IT security objectives.
