## Benefits

In a world of increasing demands and diminishing resources, we are working longer hours, spending more time outside work connected to technology and taking less time to reflect, renew and prioritise. Recent research shows that:

- 64% of the population sleep less than 7-8 hours a night
- 73% find it difficult to focus on one thing at a time
- 64% say their decisions at work are influenced by external demands rather than a clear and strong sense of purpose
- 64% say that they feel irritable, impatient or anxious at work
- 61% spend too little time doing what they do best & enjoy the most
- 80% say they spend too much time reacting to immediate demands rather than being strategic and focusing on the longer term

On the hamster wheel of delivering results, we rarely stop to consider what we want, where we should be, or how we should be investing our energy. Very often our working practices ignore our basic needs & serve to drain our energy.

### **There are four key ways to manage stress and energy so we are more resilient:**

- Sustaining our physical body
- Securing our emotions
- Building mental toughness
- Living a life of significance

### **This course will help delegates to:**

- Boost productivity and engagement at work
- Enhance morale
- Increase your ability to positively influence pressure situations
- Manage stress levels
- Deepen your understanding of how to manage energy

- Develop positive rituals that enhance your happiness and performance at work and home
